Customer Testimonial

"AAT Gary is amazing! We reached out through email, and he wanted to come to our shop right away. He did not waste any time.

We collaborated about the space required. We had multiple discussions. He was very professional, his advice was insightful, helpful and incredibly knowledgeable.

He reassured us he would always be there to help if needed. He offered Training the works. This package was so incredible it made you doubt this is too good to be true. But it wasn't. Gary is a man of his word.

He did everything he said he was going to do and then some. From the time we agreed to purchase to receiving the products. Gary was there every step of the way. He is still helping us with our ongoing use today.

He has always been there for us when we run into a snag. My husband went to the training.

He learned all he needed to start calibrating and invoicing.

Understanding the Calibration process has helped us keep our customers safe.

His continued support following training is bar none the best we have ever experienced purchasing any product in our lifetime. Staying current and up to date in this ever-changing automotive industry is very hard. Gary made it easy! We could not have bought this product from a better person and Company."
