Glass

## Customer Testimonial

"I have worked in the glass industry calibration windshield cameras for many years. Many of the body shops I currently service have asked if I would expand to do all their ADAS calibrations.

I sent an email to Autel who connected me to Gary, owner of AATI. The connection has given me all the tools I need to expand my business. I have learned how to market my company to collision shops.

Gary included marketing materials, and a process to show a body shop owner how to import his estimate into ADAS Think software.

I also received 2 days of ADAS calibration tutoring on actual vehicles from collision centers requiring calibrations, resets

and re-learn procedures for many different safety systems.

With Rob's tutoring on the second day I was doing calibrations from start to finish all by myself. I will be able to go back to my business and start making money doing ADAS calibrations.

It's also a bonus I can call Gary or Rob for Tech support or any questions I may have."
