

## Customer Testimonial

### Joe Kessel

Auto Tek Middle  
Island, NY

“With 33 years in the auto collision industry, I reached out to Autel, looking to purchase the required equipment to open a full service calibration center.

I was very fortunate to be directed to Gary who instantly impressed me with his vast knowledge of ADAS, Autel and the industry.

After a very low pressure sales call and an invitation to a functioning training facility, I was sold. We purchased the machine and joined Gary and Rob for hands-on training.

That however, wasn't the end of our professional relationship.

Both Gary and Rob have been repeatedly available to myself and my employees for a variety of questions and issues.

The Autel product backed up by Gary and Rob provided us

with a trouble free learning curve and has helped us create a wonderful new business.

If you are considering the purchase of calibration equipment, I highly recommend Autel. If you choose Autel, there is no better choice than Gary and his team.”
