Body & Paint

## Customer Testimonial

"I've been in the automotive refinish industry for 25 years. We connected with Gary with AATI when we emailed Autel.

Gary was quick to get in contact with us and made sure he fully understood our needs. He conferenced with our team and answered all the questions we had.

He provided us with a package that specifically met our needs. We traveled to his facility in Boston in February of 2024. The training we received was second to none.

They provided hands-on training, real-time knowledge, a long-term contact, partnership, and friend.

By the time we completed training, we had the knowledge we needed to implement our new ADAS calibration system into our business.

Their great customer service didn't end when we left the training class. They continue to provide us with additional knowledge and problem-solving, whenever something arises.

We know we made the right choice purchasing from Gary and his team at AATI."
