

Bill Murphy

Business Owner

Customer Testimonial

"Hi Gary, I wanted to thank you for your continued support for my latest purchase of the Autel ADAS Calibration system.

You provided the training we needed and most importantly you provided a direction when calibrations needed a little more technical advice.

I've had the good fortune of finding you many years ago to supply my necessary computer scan tools to stay current and relevant in this ever-changing environment.

I use the analogy of running a business is like being a captain of a ship.

My job is steering the ship and plugging the money holes all while navigating into calm profitable waters.

After 36 years in business, I can say buying from you and attending many of your Technical Training classes has

directly facilitated my continued success in the Auto Repair business. I've owned the Autel ADAS system for over a year. HUGE Success.

Your extensive technical training background has led you to a great business opportunity to provide a valuable needed service that many garages and body shops don't provide. Most cars leave body shops and repair facilities not getting the necessary Calibrations.

The more I know the more I see the opportunity to make cars safer for everyone. One of the lessons I've learned is that business owners don't tell other businesses where their Honey hole is.

Buying from you with your training and after purchase support is a honey hole they don't have to miss out on."
